

## Authorisation to Operate an Aquaculture Production Business (APB)

### SJ Koi Carp

Authorisation Number: **EW113-E-572A**

This authorisation document must be made available for inspection by the Cefas Fish Health Inspectorate.

This is to certify that

**SJ Koi Carp , 23 Allenby Avenue, DEAL, Kent, CT14 9AZ (EE113-C-570)**

Is hereby authorised by the Cefas Fish Health Inspectorate (FHI) under the Aquatic Animal Health (England and Wales) Regulations 2009 to operate an Aquaculture Production Business (APB) at **SJ Koi Carp, Unit 1 Dale Barn, Langdon Abbey, DOVER, Kent, CT15 5HJ** grid reference **TR32634696**, subject to the details and conditions as set out below:

#### Details of Authorised Activity:

- 1) Import for purposes other than aquaculture, restocking, purification & human consumption, fish/ mollusc/ crustacean that are neither susceptible to or vectors of the diseases controlled in GB and listed in Annex IV of Council Directive 2006/88/EC, Annex 1 of Regulation (EC) No 1251/2008 and Schedule 1 of the Aquatic Animal Health (England & Wales) Regulations 2009.
- 2) Import for purposes other than aquaculture, restocking, purification & human consumption the following species *Cyprinus carpio*.

#### Authorisation conditions:

- 1) All imported stock must be correctly health certified where required, using the relevant certificates. The FHI will provide advice on which certificates are appropriate.
- 2) Operate in accordance with an approved, documented Biosecurity Measures Plan suitable for the reduction of risk of disease spread to, from and within the APB. This plan must be current and available for inspection by the FHI at all times.
- 3) Notify the FHI of new sources of fish/ mollusc/ crustacean that are susceptible to or vectors of the diseases listed in Annex IV of Council Directive 2006/88/EC, Annex 1 of Regulation (EC) No 1251/2008 and Schedule 1 of the Aquatic Animal Health (England & Wales) Regulations 2009 a minimum 5 working days in advance of any planned import and gain FHI approval to proceed. A new source includes those not used in the last 3 years and those supplying a species for the first time.
- 4) Immediately notify the competent authority (FHI) on suspicion or knowledge of the presence of a listed disease in aquatic animals. Notify the FHI or nominated veterinarian of any increased, unexplained or unusual mortalities.
- 5) You must obtain prior permission from the FHI for the introduction of a species not listed above. You must notify the FHI in writing, in advance of any other material changes to this authorisation.
- 6) Maintain records of all aquatic animals, live or dead, into and out of the authorised premises, in a format agreed with the Fish Health Inspectorate. Where animals are moved between authorised or registered businesses, the name and APB number of the source or receiving business must be included in those records.
- 7) Provide all reasonable help and access to the FHI and participate in a risk-based surveillance scheme, including assistance during the inspection and sampling of any aquatic animals as required
- 8) Packaging materials for imported consignments should be disinfected before reuse or disposal, alternatively they can be disposed of by incineration.
- 9) Take all necessary precautions to contain and to prevent the escape of aquatic animals.

NB: Controlled non-native species can only be kept under the terms of an appropriate licence.

- Failure to comply with legal obligations may result in prosecution under the Aquatic Animal Health (England and Wales) Regulations 2009
- The Registration is without prejudice to the application of other relevant legislation.
